Whitelist of IP Addresses

ThorApps Online Services is a collection of apps and services that ultimately integrate various Microsoft technologies across the internet. ThorApps attempt to provide most services for each app out of the box, but in some cases, you may wish to connect to your own services. When doing so your services should be secured behind a firewall. You will need to add ThorApps IP addresses as a whitelist in your fire wall configuration for ThorApps services to communicate with your services.

The table below lists the IPs for ThorApps apps.
