Reflex Reporting 2013 Deployment Guide

Author: Michael Bear

Date: 02 Oct 2018

Version: 2.0

Overview

This document describes the steps to deploy ThorApps Reflex Reporting 2013 into a SharePoint 2013 farm.

Prerequisites

To follow this guide, you must have followed the Reflex Reporting 2013 Installation Guide included in this download, and have access to the following:

- A computer with internet access
- Remote console access to the SharePoint server hosting SharePoint Central Administration (directly or via remote desktop)
- SharePoint farm administrator rights (or access to such credentials) with access to deploy SharePoint farm solutions (i.e. SharePoint Configuration database write access).

Steps

Open SharePoint Central Admin from the Start menu (this ensures it is opened as an Administrator).
Click "System Settings".
Click "Manage farm solutions". This will display the solutions installed on the farm and their deployment details.

System Settings

Central Administration

- Application Management
- System Settings
- Monitoring
- Backup and Restore
- Security
- Upgrade and Migration
- General Application

Servers
Manage servers in this farm | Manage services on server

E-Mail and Text Messages (SMS)
Configure outgoing e-mail settings | Configure incoming e-mail settings | Configure mobile account

Farm Management
Configure alternate access mappings | Manage farm features | **Manage farm solutions** | Manage user solutions | Configure privacy options | Configure cross-firewall access zone

SharePoint

Solution Management

Name	Status	Deployed To
thor.ps.pie.wsp	Not Deployed	None
thor.spf.licensemanager.wsp	Deployed	Globally deployed.
thor.spf.reflexreporting.wsp	Deployed	Globally deployed.

If the License Manager is NOT yet deployed, it will need to be deployed before Reflex Reporting can be deployed.

Click on "thor.spf.licensemanager.wsp"

Click "Deploy Solution".

Solution Information

Information on the solution you have chosen to deploy.

Name: thor.spf.licensemanager.wsp
Locale: 0
Deployed To: None
Deployment Status: Not Deployed

Deploy When?

A timer job is created to deploy this solution. Please specify the time at which you want this solution to be deployed.

Choose when to deploy the solution:

☒ Now
☐ At a specified time:
8/6/2018 3 PM 00

Deploy To?

The solution contains no Web application scoped resource, and therefore cannot be deployed to a particular Web application. It can only be deployed globally.

This solution deploys globally.

Warning: Deploying this solution will place assemblies in the global assembly cache. This will grant the solution assemblies full trust. Do not proceed unless you trust the solution provider.

OK

Cancel

The Reflex Reporting Solution deploys in the same manner.
Click on "thor.spf.reflexreporting.wsp".
Click "Deploy Solution".
Click "OK".

So what's next?

Configuration

Once your solution is deployed, follow the Configuration Guide included in your download package, and on the ThorApp's web site (www.thorapps.com).

Purchasing

If you have completed the solution installation and configuration and have decided to purchase a license, follow the Purchasing Guide included in your download package.

Licence Activation

If you have already purchased a license and wish to activate the Product Key, please follow the Licence Activation Guide included in your download package.
