## ThorApps Solutions for SharePoint 2013 License Activation Guide

Author: Michael Bear

Date: 02 Oct 2018

Version: 1.0

## Overview

This document describes the actions required to activate a license key (product key) for ThorApps Solutions for SharePoint 2013.

## Prerequisites

To follow this guide, you must have access to the following items.

- A computer with internet access
- Access to the SharePoint server hosting SharePoint Central Administration (directly or via remote desktop).
- SharePoint farm administrator rights (or access to such a logon).
- The solution must already be installed and deployed (see solution installation and deployment guides)
- A valid product key (received when the solution is purchased)

## Steps

If you have internet access from the server hosting SharePoint Central Administration, activation is easy. We call this "Online Activation".

If you do not have internet access from the server hosting SharePoint Central Administration activation is still easy but involves a few more steps. This is referred to as "Offline Activation" although it does still require you to have internet access via another device.

### Step 1

From your desktop open a remote desktop connection to the server hosting SharePoint Central Administration and login using a SharePoint Farm Administrator logon.

Open SharePoint Central Administration via the Start menu (press the windows key and search for "Central Admin" to locate it).

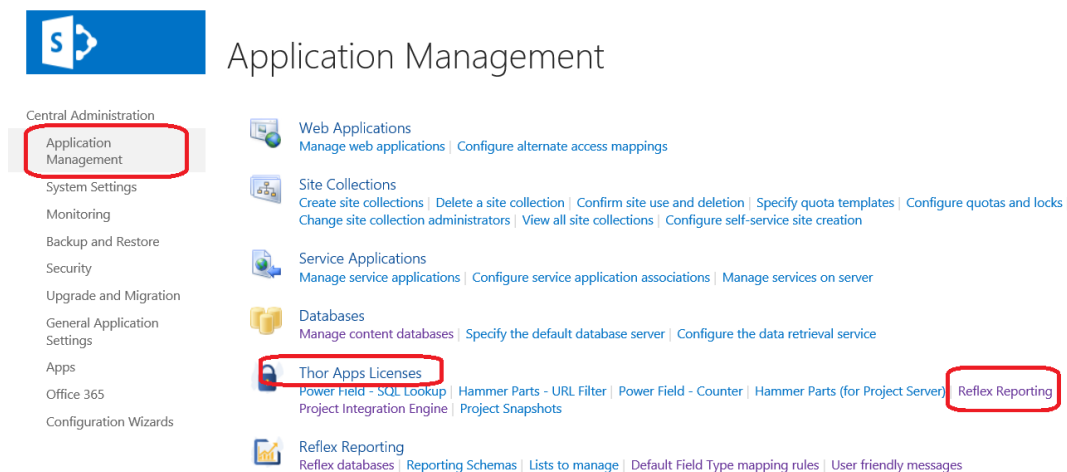

Opening SharePoint Central Administration via the Start menu ensures it starts with administrator rights.

## Step 2

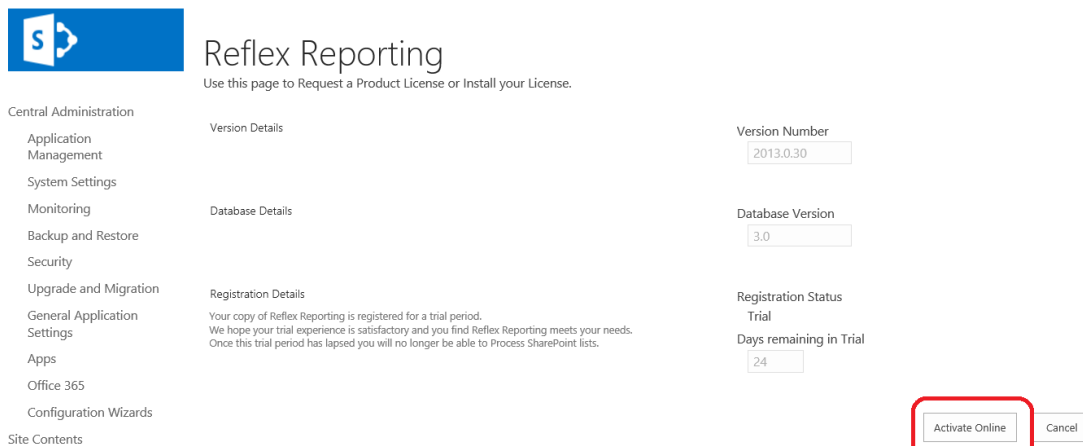

From SharePoint Central Administration, click on "Application Management" Under the "Thor Apps Licenses" menu group, click on the solution you are activating the license for. If you can't find it (or the menu group is not shown), the solution must not yet be installed or deployed. You will need to install and deploy it first (see solution installation and deployment guides).

This guide uses Reflex Reporting as an example, but this process works across all ThorApps Solutions for SharePoint 2013.

The screenshot shows the 'Application Management' page in SharePoint Central Administration. The left-hand navigation pane has 'Application Management' highlighted with a red rectangle. The main content area lists various application categories. Under the 'Thor Apps Licenses' category, which is also highlighted with a red rectangle, there are links for 'Power Field - SQL Lookup', 'Project Integration Engine', 'Hammer Parts - URL Filter', 'Power Field - Counter', 'Hammer Parts (for Project Server)', and 'Reflex Reporting'. The 'Reflex Reporting' link is highlighted with a red rectangle.

You will be taken to the registration page as shown below:

The screenshot shows the 'Reflex Reporting' registration page. The left-hand navigation pane has 'Application Management' highlighted with a red rectangle. The main content area is titled 'Reflex Reporting' and includes the instruction 'Use this page to Request a Product License or Install your License.' Below this, there are three sections: 'Version Details' with a 'Version Number' field containing '2013.0.30'; 'Database Details' with a 'Database Version' field containing '3.0'; and 'Registration Details' which states 'Your copy of Reflex Reporting is registered for a trial period. We hope your trial experience is satisfactory and you find Reflex Reporting meets your needs. Once this trial period has lapsed you will no longer be able to Process SharePoint lists.' To the right of the 'Registration Details' section, there is a 'Registration Status' section showing 'Trial' and 'Days remaining in Trial' with a value of '24'. At the bottom right, there are two buttons: 'Activate Online' (highlighted with a red rectangle) and 'Cancel'.

If you do not see the "Activate Online" button, and instead see "Request" and "Install" buttons, the server does not have internet access and you will therefore have to proceed with "Step 4 (Offline Activation)".

If you instead see only a "Cancel" button, the license is already activated.

## Step 3 (Online Activation)

Click on the "Activate Online" button.

Enter the product key you received when you purchased the solution into the Product Key box.

Click "Activate".

Activate

Cancel

Skip to Step 7.

## Step 4 (Offline Activation)

Offline activation involves producing a unique string from your SharePoint farm and emailing it to us at [support@thorapps.com](mailto:support@thorapps.com).

Click the "Request" button. This will generate a "Request Activation String", as shown below. Copy this to your clipboard.

The image shows the 'Reflex Reporting' application interface. On the left is a navigation menu with items like 'Central Administration', 'Application Management', 'System Settings', 'Monitoring', 'Backup and Restore', 'Security', 'Upgrade and Migration', 'General Application Settings', 'Apps', 'Office 365', 'Configuration Wizards', and 'Site Contents'. The main content area has a title 'Reflex Reporting' and a subtitle 'Use this page to Request a Product License or Install your License.' Below this are three sections: 'Version Details' with a 'Version Number' field containing '2013.0.30', 'Database Details' with a 'Database Version' field containing '3.0', and 'Registration Details' with a 'Registration Status' section showing 'Trial' and 'Days remaining in Trial' as '24'. At the bottom right, there are three buttons: 'Request', 'Install', and 'Cancel'. The 'Request' button is highlighted with a red rectangular box.

This image shows the same 'Reflex Reporting' interface as above, but with the 'License Request String' field highlighted by a red rectangular box. The 'Request' button is no longer visible. The 'License Request String' field contains the following text: `<INCLUDE_THIS_TAG>8n3YVe3TouDDIGzL674dePygpCTSrBlv+EN20t4wqzENIsiirrqzkrpnbYUaMugB8WOhyPY+ZyZ8pHCc22hCnxV9YTP8p6W1f924k0WA=</INCLUDE_THIS_TAG>`. Below this field, there is a vertical line of text that is partially cut off at the bottom.

## Step 5

From your desktop computer (or any device with internet access) open an email client, and create a new email addressed to [support@thorapps.com](mailto:support@thorapps.com), with "License Activation" in the subject line. Copy your valid Product Key and the Activation Request String into the body of the email, and click "Send".

The screenshot shows an email client interface with a dark theme. On the left, there is a 'Send' button with a paper plane icon. To the right of the button are three input fields: 'From' (containing 'mbear@begsolutions.com.au'), 'To...' (containing 'support@thorapps.com'), and 'Cc...' (empty). Below these fields is a 'Subject' field containing 'License Activation'. The main body of the email is visible below the fields, containing the following text:

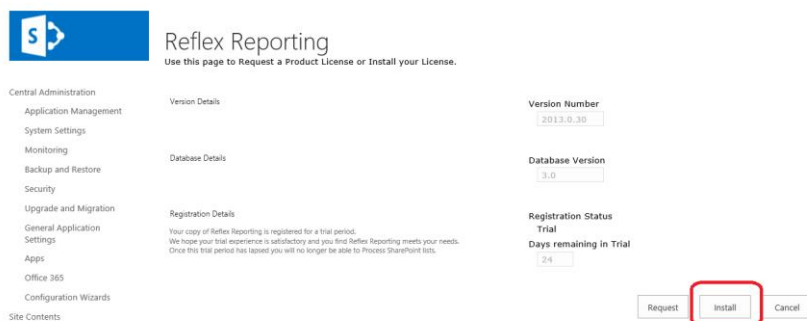

```
545345a8-7838-567e-ba4c-3d3678e9fdc  
<INCLUDE_THIS_TAG>  
8n3iYVe3TouDDDIGzL674dePygpCTSrBlv+EN20t4wrw/TKCHRV0sCU00Oiuky9D1epjFqrY9LwLsjSnQ77EzOOEpE008Q3tyzkqRTOiK08=  
</INCLUDE_THIS_TAG>
```

The ThorApps Support team will respond with an email that has a file called "ThorAppsSubscriptionLicense.lic" attached. Save this file to a convenient location on the server hosting SharePoint Central Admin (such as C:/Temp or similar).

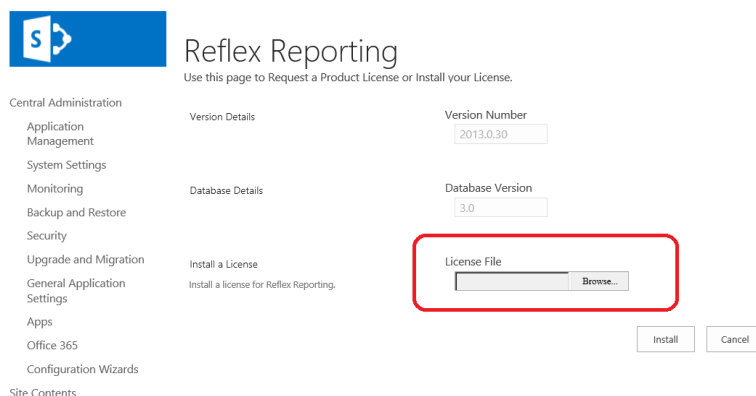

## Step 6

Return to the server hosting SharePoint Central Administration and navigate back to the ThorApps license page ("Apps/Manage ThorApps Licences" then select the product you are activating the license for).

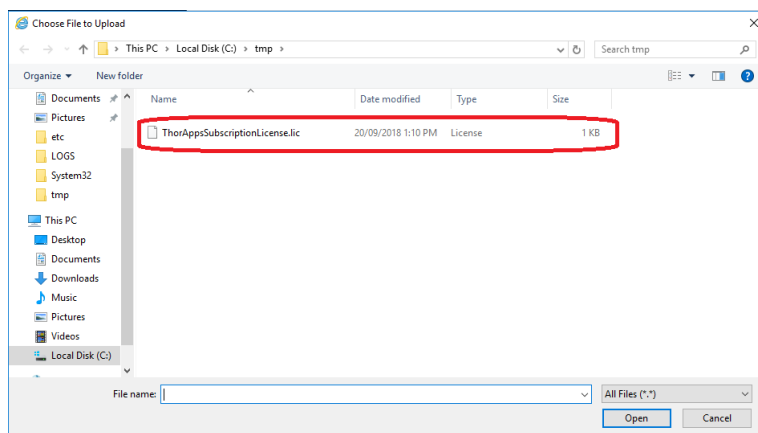

Click "Install".

You should see an "Install" button. Click it and you will be presented with the following page.

Click the "Browse" button and select the "ThorAppsSubscriptionLicense.lic" file you saved earlier.

Click "Open" on the file selection dialog window and then click "Install".

## Step 7 - Finish

Click "OK". The solution is now fully licensed.

You can double check the status of the solution by navigating in SharePoint Central Administration back to the License page (Application Management and the relevant item under the "Thor Apps Licenses" menu group).

## So, what's next?

If you have followed the guides in the correct order there will be nothing left to do but to configure and use the solution. You can follow the configuration guide which will be specific to the solution you have downloaded. The ThorApp's solution configuration guides can be found in the solution installation package and on the ThorApp's web site ([www.thorapps.com](http://www.thorapps.com)).
