Project Integration Engine 2010 Deployment Guide

Author: Jonty Svanborg

Date: 2 Oct 2018

Version: 2.0

Overview

This document describes the steps to deploy your Project Integration Engine (PIE) 2010 solution in your SharePoint 2010 farm.

Prerequisites

To follow this guide, you will need the following items:

- A computer with internet access
- Remote console access to the SharePoint server hosting SharePoint Central Administration (directly or via remote desktop)
- SharePoint farm administrator rights (or access to such credentials) with permission to deploy SharePoint farm solutions.

Steps

Open SharePoint Central Admin from the Start menu (this ensures its opened as an administrator).
Click on "System Settings".
Click on "Manage farm solutions".

Microsoft SharePoint 2010 Central Administration System Settings
