Purchasing Guide

Author: Jonty Svanborg

Date: 28 Sept 2018

Version: 2.0

Overview

This document describes the steps to purchase a License (Product Key) for any ThorApps Solution.

Prerequisites

To follow this guide, you will need the following:

- Email
- Someone to be a point-of-contact

Purchasing a ThorApps solution requires you send an email to ThorApps HQ providing key information. A ThorApps support team member then replies with your Product key and billing information.

Steps

Compose a new email in your preferred email client.

Type into the To field 'info@thorapps.com'

Type into the Subject field 'Purchasing [solution name]'

In the body field, provide the following information

- Your Business/Company name
- The name of someone to be a Point-of-Contact
- A means of contacting this person such as an email or phone number
- The ThorApps solution/s you wish to license
- How long you would like the license for (if subscription based)

Send the email.

A ThorApp's support team member will reply with your Product Key and billing information.

So, what's next?

Now that you have a Product key for your solution, you will want to follow the License Activation Guide included in your download package. The guide is also available on ThorApp's web site (www.thorapps.com).
